

Dear Commissioner Friedman,

*This is an
outrageous practice*

It is good to hear that the FDA is finally going to restrict the feeding of dead cows to live cows. It is unconscionable, however, that your new policy *fails* to take into account the dangers posed by feeding dead and diseased pigs, horses, and chickens to cows and other farm animals. How many Americans will have to die from Mad Cow Disease (BSE) before the FDA stops this deplorable and deadly practice?

I join with the Humane Farming Association in calling for an immediate nationwide ban on the use of dead animals in livestock feed.
